EDUCATION

42 Ecole
2019 - Current

IESEG
Master of international business
2015-2016

Chauhu University
Licence of Information & computer science
2010-2014

SKILLS

- Python
- C
- C++
- Bash
- TypeScript
- NestJS
- React
- Docker
- Kubernetes
- Git
- Debian

SUMMARY

I have always had a passion for technology and programming, and in 2018, I decided to pursue my dream by returning to school to expand my skillset. Through thousands of hours of study and practice, I've gained experience with various programming languages and tools, and I am confident in my ability to develop code for production environments.

After completing multiple fully-fledged applications and other smaller projects ; I am now eagerly looking for an internship in a collaborative and motivated team.

SOFTWARE DEVELOPMENT PROJECTS

ft_transcendence (group) - fullstack app
an one-page website with a multiplayer Pong game and various features such as OAuth, chat, messaging, friend lists, profiles, and match-making.

webserv (group) - recoding our own web server in C++
- Developed a robust server using C++98 based on the HTTP/1.1 RFC standards

ft_services (solo)- setup an infrastructure on a Kubernetes cluster
Minikube setup, Docker image build, and deployment of inter-connected services such as nginx, FTPS, WordPress, PHPMyAdmin, and Grafana.

cub3D (solo) - game development
a Wolfenstein game clone using 42's graphics library.

minishell (solo) - developed a command-line shell in C from scratch

Other projects (More in Github)
- *ft_containers* (solo): re-implement the STL containers
- *philosophers* (solo): multi-threads/multi-process programming using mutex and semaphore.
- *push_swap* (solo): given a set of integers, sort it using a predefined set of instructions using two stacks.
- *ft_server* (solo): creating a web server with Nginx capable of running a WordPress website.

WORK EXPERIENCE

Effiel para-pharmacy
Manager assistant
2016-2017
- Digitally craft displays to showcase key products and promotions

EuroPass
